Projects

Smart AI-Based Quiz Generator | **Microservices Architecture**

- Designed and implemented a microservices-based quiz platform with secure authentication and role-based access.
- Integrated Spring AI for intelligent quiz generation and evaluation.
- Used Kafka & RabbitMQ for asynchronous communication and event-driven workflows.
- Implemented API Gateway, centralized security using Keycloak + JWT, and documented APIs using Swagger.
- Containerized services with Docker and deployed using Kubernetes (basic setup).

IRCTC Backend System

- Developed a scalable backend system simulating IRCTC ticketing workflows.
- Implemented Payment Gateway and modular service architecture.
- Used JPA, JDBC, and Hibernate for efficient database interactions.
- Created REST APIs with proper documentation using Swagger/OpenAPI.

Smart Result Management System

- Built a secure student result management system with authentication and authorization.
- Implemented Spring Security + JWT for secure login and role-based access.
- Designed dynamic UI using Thymeleaf, HTML, CSS, and Tailwind CSS.
